TECHNOLOGY DRIVES INNOVATION FOR

STATE & LOCAL GOVERNMENT.

How leaders can build a more modern, well-connected community.

COX BUSINESS®

TECHNOLOGY CREATES EXPERIENCES

Successful state and local leaders all have one thing in common – they understand the role technology plays in creating better experiences for their communities. Savvy government agencies are now connecting the dots on how technology solutions drive efficiencies for staff, operations, maintenance, infrastructure and the citizens they serve.

EMBRACING A SMARTER CITY

In order to keep pace with other cities and remain competitive in attracting top talent and businesses to the area, state and local leaders are looking to innovation to improve all aspects of their communities. But what does a smarter, more modern, well-connected government really look like today?

WELL CONNECTED GOVERNMENT

COX BUSINESS®

HOW YOU CONNECT MATTERS

Imagine having robust connectivity across multiple government locations, with staff and team members who are more productive, information that moves faster, and data that's more secure and protected from unexpected events.

MULTIPLE LOCATIONS — **PRODUCTIVITY** — **FAST & SECURE DATA**

IMPROVE OPERATIONAL EFFICIENCIES

Imagine operations and maintenance teams having remote access to cloud-based software applications that can provide real-time project status updates from the field for both city leaders and their constituents.

WELL CONNECTED
GOVERNMENT

COX
BUSINESS®

CONNECTIVITY & REDUNDANCY

METRO ETHERNET

REALLY CONNECT:

Imagine having high bandwidths and being able to seamlessly connect multiple locations while potentially even boosting productivity among leadership and staff alike with incredible ease.

WAVELENGTH SERVICES

BUILD CONFIDENCE:

Discover a point-to-point powerful connection that moves information faster so you can make decisions more quickly. Includes low-latency dedicated bandwidths and greater up-time.

INTERNET SERVICES

EXCEL FASTER:

Watch your staff and operations thrive with fast speeds that accelerate productivity and decision making. Ask about Cox Optical dedicated fiber with speeds up to 100Gbps.

HOSTED VOICE

TALK IT UP:

Simplify communications across locations with phone systems you can remotely scale and manage from anywhere. IP Centrex provides a cloud-based easy-to-use business voice platform.

NETWORK & SECURITY

MANAGED Wi-Fi

GET OUTSIDE THE BOX:

Imagine taking work tasks beyond the walls of your office building through a reliable, well-connected managed Wi-Fi service. We install all hardware and manage all the connectivity 24/7.

*Purchase or lease equipment

NOC as a Service

ENJOY PEACE OF MIND:

Free up your IT team resources by outsourcing management and monitoring of your network to industry experts. It comes with round the clock protection and SLA's.

SD-WAN SERVICES

EXPAND DEVICE USAGE:

SD-WAN helps you to improve workflow efficiency, expand use of virtual desktops & applications, enhance reliability, and reduce both bandwidth needs and operational costs.

MalBlock

DEVICE PROTECTION:

MalBlock is an Internet security solution that protects your electronic devices by blocking malicious websites. MalBlock offers protection at the DNS layer, the fabric of the Internet.

COX
BUSINESS®

NETWORK & SECURITY

MANAGED FIREWALL

KEEP IT VERY SECURE:

Managed Firewall provides advanced malware protection and an adaptive, next-generation firewall service that delivers integrated threat defenses for the entire threat attack continuum.

EMAIL SECURITY

PROTECT EMAIL UPTIME:

Help to ensure maximum continuity to your email environment during a downtime event. Mimecast's web-based management console gives your IT Team control and enables users to solve via self-service apps.

DDoS MITIGATION

COMBAT CYBER ATTACKS:

Our cloud-based Distributed Denial of Service (DDoS) Mitigation solution helps you combat malicious and complex waves of cyber attacks meant to overwhelm your network.

CLOUDPORT

A PRIVATE NETWORK:

Our CloudPort Solution maps all traffic into a real-time Ethernet Virtual Connection and provides secure, direct access to cloud-based applications using Cox Private Metro-Ethernet, increasing security and providing DDoS immunity.

NETWORK & SECURITY

PRIVATE LINE

HIGH SPEED & CAPACITY:

Cox Business Private line provides a clear, reliable high-speed connection for stand-alone or integrated voice, data, and video communications between multiple locations. It's perfect for dedicated access to Internet Service Providers, PBX to PBX, LAN, MAN and WAN.

MPLS IP-VPN

SECURE REMOTE ACCESS:

Connect multiple buildings in multiple locations so you can exchange sensitive data worry-free. With the power of MPLS technology, you receive the trusted performance, reliability, and security of a private line with the scalability and flexibility of an IP network.

DARK FIBER

PRIVATE AND SECURE:

By provisioning your traffic through a dedicated dark fiber strand, the fiber-optic network is the most secure option available without sharing telecom services between providers. It is a dedicated infrastructure that ensures privacy.

COX
BUSINESS®

MANAGED CLOUD SERVICES

CLOUD DESKTOP

GO VIRTUAL:

Gain remote access to the fixture to Create a seamless user experience by accessing your physical desktop and all the necessary files and applications from anywhere with an internet connection – all managed for you 24/7.

INFRASTRUCTURE (aaS)

FREE UP SPACE & COSTS:

Infrastructure as a Service allows you to migrate your equipment & infrastructure to the cloud and save both time and money on overall maintenance costs for existing equipment.

CLOUD BACK-UP

BREATHE EASY:

Enjoy peace of mind knowing all your critical data and applications are backed up and able to be restored in the event of a disaster. Business back-up enables continuous data capture with encryption.

COX EDGE

GET IT IN REAL-TIME:

Enhance performance and decision making by gaining real-time insights and analytics from deployed devices that processes content at the device point which mitigates costs of latency.
